

- 18 parallel digital inputs**

(16bits + sign + lock)

BCD, Gray, Binary input formats

- Analog output**

0...4...20mA, 0...10Volts, 16 bits resolutions

- Optional relay output (CNA105/R)**

2 programmable thresholds

- Application :**

Interface for parallel outputs encoders

The CNA105 is a converter for parallel outputs encoders. It converts the encoder's position into an analogical signal output. The display allows a quick diagnosis on the proper operation. The CNA105 may be used in many application through its user programmable configuration (encoder resolution, code format type: BCD, gray, binary, polarity, sign, ...).

The output relay provide a local management of block stop or alarms.

Description :

Synoptic:

Parallel digital inputs:

- 16 digital inputs
- 1 digital input for sign (facultative)
- 1 « LOCK » input (facultative)

Digital input can be for voltage level or dry contact
(polarization voltage of 22v available)

Type of input code configurable: BCD , GRAY , Binary
Resolution : from 1 to 16 bits signed or not.

Front face :

2 lines of 16 characters LCD backlit display

Viewing of inputs state, type of decoding, analog output value, state of relay,

The display of input code may be in decimal format or in another user display range (correction factor). Changed view with "display" button.
The display allows to have a origin shift (tare)

Configuration:

Three push buttons are used for the configuration.

Two configuration mode available (user or installer).

Analog output :

The analog output is the encoder position feedback into an isolated current or voltage form (0...4...20 mA or 0...1...5....10V).

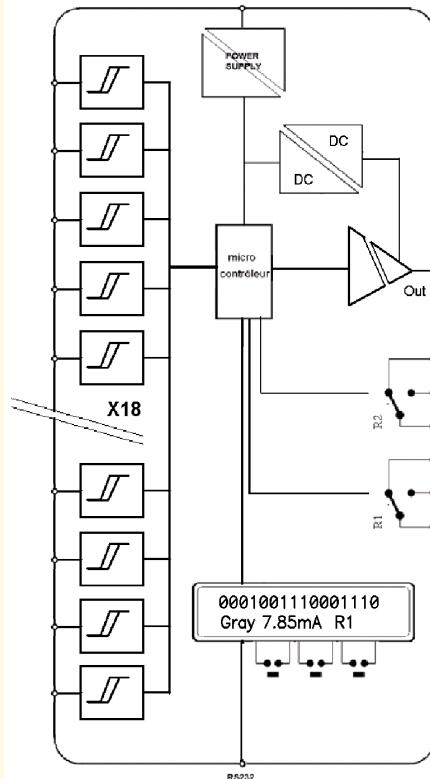

Relays :

The device can have 2 thresholds with /R option. (configurable thresholds, sens, hysteresis, delay)

Each alarms drive a relays when the preset threshold is exceeded.
The relay may be configured in positive or negative security mode
(Normally Open / Normally Close)

Features:

- rail DIN mounting,
- Connection on spring terminal 1.5 mm²,
- conformal coating.
- protection rating (enclosure / connectors) : IP20
- optional mounting in IP65 box

Version and order code:

CNA105 : 18 digital inputs (16bits + sign + lock) and analog output

[Request a quote](#)

OPTION :

- CNA105/R1** : + 1 relay
- CNA105/R2** : + 2 relay

DIGITAL INPUT

| | Min | Max |
|-------------------------------------|-------------------------|-------|
| Logical state | | |
| Level 0 | 0 V | 1 V |
| Level 1 | 10 V | 150 V |
| Input impedance : | 100 kOhms | |
| Voltage polarisation : | 22Vdc (for dry contact) | |
| (All inputs are with common ground) | | |
| Measure rate : | 70 per second | |

OUTPUT (analog, 16bits resolution)

| Type | Range | Accuracy |
|-------------------|--------------------------------|-----------|
| Current | 0 ... 4 ... 20 mA | +/- 5 µA |
| Maximum load: | 850 Ohms | |
| Voltage | 0 ... 10 V | +/- 10 mV |
| Output impedance: | 500 Ohms (internal 0.1% shunt) | |

Response time programmable from 20 ms to 60 s

Relay

Switching capacity: 250Vac / 10A (200 Vdc / 0.6A)

POWER SUPPLY (to define at order)20 to 265 Vac-dc, 3 VA
11 to 30 dc, 3 VA**ENVIRONMENT**

| | |
|--------------------------------------------|------------------------|
| Operating temperature | -20 to 60 °C |
| Storage temperature | -25 to 85 °C |
| Influence | < 0.01 % / °C |
| Humidity | 85 % not condensing |
| Weigh | 250 g |
| Protection rating | IP 20 |
| Dielectric strength : | |
| Input/supply/relays/output : | 1500 Veff continuous |
| No isolation between inputs. Common ground | |
| MTBF (MIL HDBK 217F) | > 3 000 000 Hrs @ 25°C |
| Life time | > 170 000 Hrs @ 30°C |
