

• **Integrated sensors:**

- **Temperature** (-40°C...+85°C)
- **Humidity** (0.....100%)
- **Barometric pressure** (500.....1150hPa)
- **Dew point** (calculated)
- **Remote dust sensor** (0.1....0.5mg/m³)

• **Communication**

- RS485 half duplex, Modbus RTU protocol

• **Power supply**

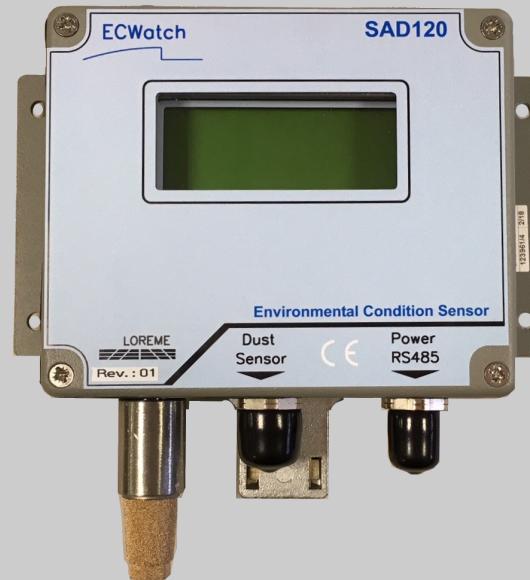

- 24V DC

• **IP66 painted aluminum case**

- Wall mounting (optional DIN rail adapter)
- Rugged M12 - 5 pin connectors (RS485, power)

• **LCD display 4 lines of 16 characters**

(temperature, humidity, atmospheric pressure, dust or speed)

The SAD120 is an ambient hardened probe for control applications or traceability of controlled atmosphere rooms. This probe allows the reading of measures through RS485 Modbus link.

Description

Measure:

- Temperature, humidity , barometric pressure, dew point and in option : remote optical dust sensor.

Features:

- Wall mounting (painted aluminum housing)
- Electronic protected by conformal coating
- Protection rating (enclosure / connectors): IP66
- DIN rail mounting with special adapter

Front panel / configuration:

- LCD display with 4 lines of 16 characters for the display of measurement and communication parameters (address and baudrate).
- Three internal pushbuttons for communication configuration (address, speed) or measure adjustment (offset)

Local serial link:

- The device can also be configured via the internal serial link (USB cable provide separately)

The serial link can also be used for firmware update.

Communication:

- RS485 half duplex (M12 male connection)

Supported protocol: Modbus RTU

Available speed: 9600, 19200, 38400 and 115200 bps

Format: 8 data bits, 1 stop bit, no parity

Test - Qualification:

- Excellent life time > 1000 hours, in extreme environment (temperature 65 ° C, relative humidity 93%)
- Return time approximately 10 seconds after 150 hours of condensation
- Humidity hysteresis < +/- 1.5%.
- Long-term stability < 0.5% / year.
- Linearity, < 1% over the range of 10% to 90% Hr

External dust sensor : CPO55

- Powered by the SAD120
- Serial communication (dust density value)
- Interchangeable (contains its own calibration)
- Cable length up to 100 meters (M12, 5 pins)
- Magnetic mount (fixing collar option)
- Anodized aluminum housing

CD12-MF
Male/Female M12
cable, 2 or 5
meters long
SAD120 / CPO55
interconnection

CD12-F
Female M12
cable wires
termination,
2 or 5
meters long
SAD120 to PLC
interconnection
24 V & RS485

Version and order code:

[Request a quote](#)

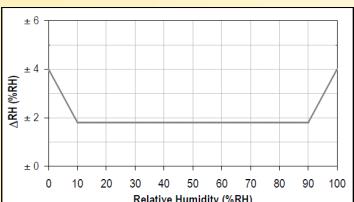

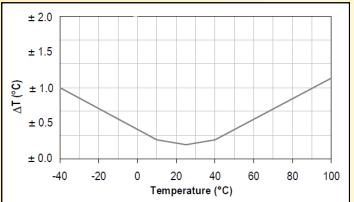

SAD120 : Hardened room sensor
(Temperature, humidity and atmospheric pressure)

Option : /RDA120 DIN rail adapter
CD12-F Female M12 cable wires termination, 2 or 5
meters long (SAD120 to PLC 24 V & RS485
interconnection)

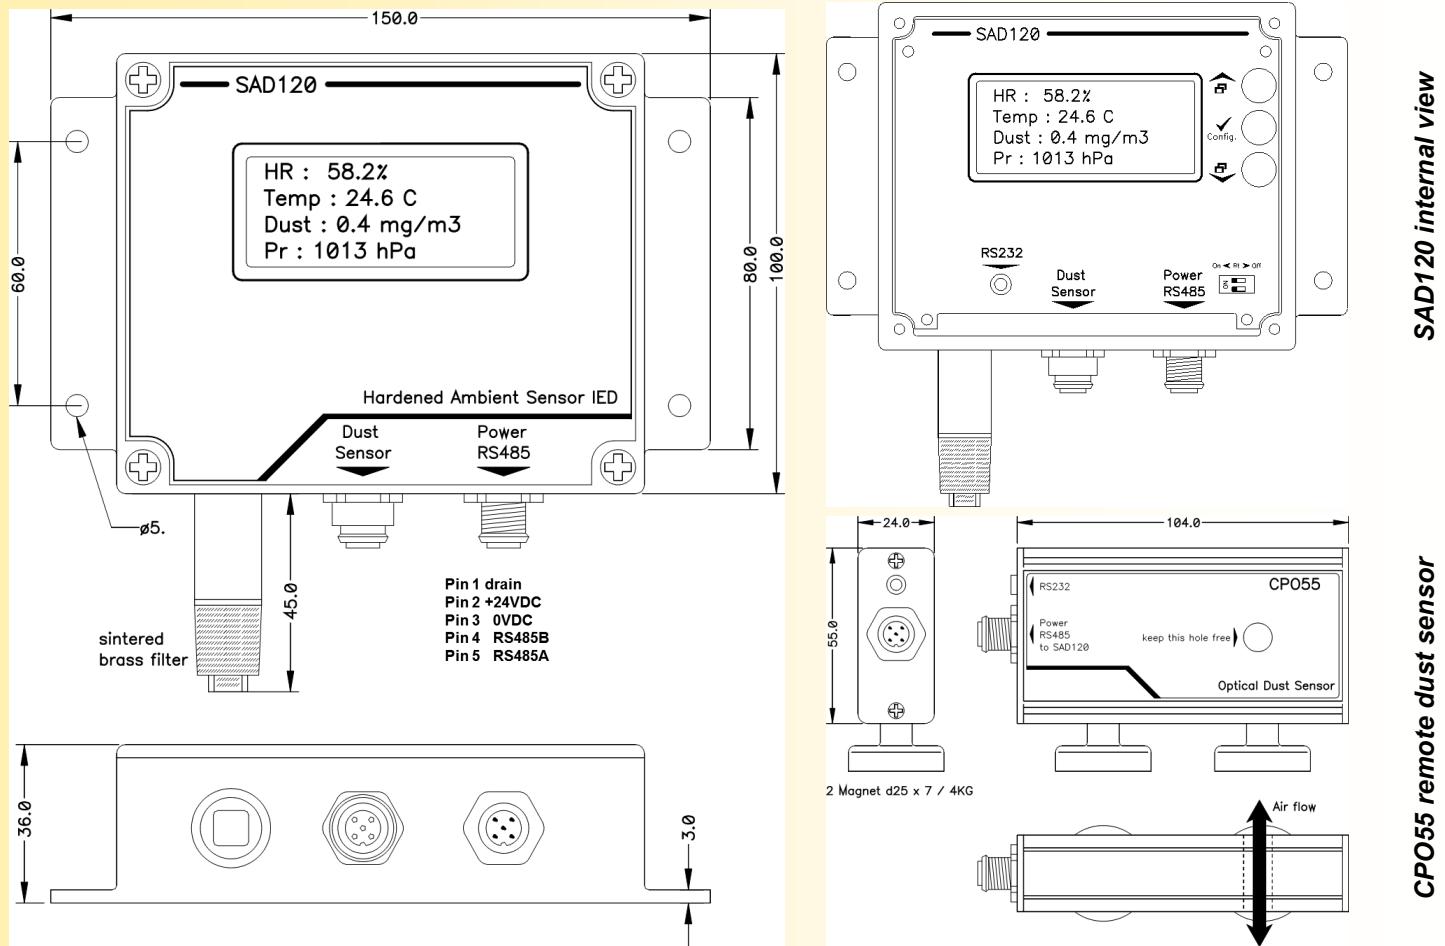

Additional modules

CPO55 : Remote dust sensor
(magnetic mount)

Option : /FC55 Fixing collars
CD12-MF Male/Female M12 cable, 2 or 5 meters long
(SAD120 / CPO55 interconnection)

MEASURE		POWER SUPPLY	
Relative humidity	Sensor operating range	0 ... 100 % HR	Nominal voltage 24Vdc (9.....36 Vdc) ; power 3 Watts Reversed polarity protection
Accuracy			
Temperature:	Sensor operating range	-40°C.....+85°C	
Accuracy			
Response time Hr and T°	45 seconds (63%) (with filter)		
Repeatability	+/- 0.1% ; +/- 0.1°C		
Linearity	< 0.2 %		
Hysteresis	+/- 1% Hr		
Long term drift	+/- 0.5% /year ; +/- 0.04°C /year		
Atmospheric pressure:			
Operating range	500 hPa 1150 hPa		
Accuracy	+/- 5 hPa (calibrated)		
Dust:	Operating range	0.1.....0.5 mg/m³
