

Stator winding probes type: SPE

Permanent motor or generator protection.

- Sensing element: Pt 100 Ohms at 0°C according to IEC 751 Class B (other accuracy classes available upon request)
- 3-wire or 4-wire connection.
- Manufactured according to NF C42-331.
- Dielectric strength: 5000 Vac.
- Insulation resistance: > 500 Mohms.
- Temperature resistance: 180°C continuous, 200°C peak.
- Body material: epoxy glass.
- Excellent pressure resistance (vacuum encapsulation).
- Special twisted-pair cable exit (limits induced currents).
- Any other configuration available upon request.

- Rapid implementation.
- Sensing element: Pt100, PT1000, NTC, etc.
- 2-, 3-, or 4-wire configuration
- Available in CT configurations: K, J, T, etc.
- Temperature resistance: 400°C continuous (depending on the model)
