

PT100 temperature converter 0...10V output 6 channels

Type: CTL105

LOREME

- **Up to 6 measure channels**

Platinum sensor inputs
0...10V voltage output

- **Fully configurable**

Range, filter, offset,....

- **"Low cost" application**

The CTL105 is a programmable multi channels temperature converter. It may be used for the treatment of PT100 temperature sensors to convert in analog signals. Mainly designed for instrumentation of full systems : Motors, heat pump, wind turbine, ...

Description :

Temperature inputs:

- Up to 6 platinum sensors probes (2 or 3 wires mounting) with linearization

Signal processing:

- individual channel inhibition
 - programmable security value for sensor breaking (short-circuit or open circuit)
 - programmable response time from 1 to 60 sec, (measure filtering function)
 - normal or reversed output,
 - offset adjustment of each channel,
- In option :
- special function for max value, min value, average value

Feature:

- symmetrical DIN rail mounting,
- connection on screw terminal blocks (2.5 mm² max),
- configuration via RS232 link,
- Configuration parameters saving on Flash memory, safety of data holding > 30 years,
- conformal coating,
- protection rating (enclosure / terminal blocks) : IP20.
- option: mounting within a IP65 enclosure

Configuration:

The CTL105 is user configurable via the serial RS 232 link with any terminal software, under any operating system.

- no need of special software,
- Through the terminal, the user will be able to:
- visualize the measure, shift the measures,
 - setting the device parameters: input range, output range, filter..

Synoptic:

Version and order code:

- CTL105/2 : 2 x PT100 inputs / 2 x 0...10V outputs
- CTL105/3 : 3 x PT100 inputs / 3 x 0...10V outputs
- CTL105/4 : 4 x PT100 inputs / 4 x 0...10V outputs
- CTL105/5 : 5 x PT100 inputs / 5 x 0...10V outputs
- CTL105/6 : 6 x PT100 inputs / 6 x 0...10V outputs

INPUT (16 bits resolution)

TYPE	RANGE	ACCURACY
PT100	-200 / 800°C	± 0.3 °C (3 wires)
The accuracy in 2 wires mounting depends of wires resistance between probe and terminals (offset correction is possible)		

measure current 900 µA
 Measure rate 6 per second
 (all inputs are with common ground)

OUTPUT (10 bits resolution)

TYPE	RANGE	ACCURACY
Voltage	0...10 V	± 20 mV
Security value	0 ... 11 V (programmable)	
Permissible load	mini 1Kohms	
Load influence	negligible	
Response time	1000 ms to 60 s	
(all outputs are with common ground)		

POWER SUPPLY

Voltage	230 Vac +/- 15%
Frequency	45...70 Hz
Consumption	< 2.3VA
(other supply voltage on request)	

ENVIRONMENT

Operating temperature	-20 to 70 °C
Storage temperature	-20 to 85 °C
thermal influence	< 0.01 % / °C
Humidity	85 % non condensed
Weight	120 g
Protection rating	IP 20

Electromagnetic compatibility 2014/30/UE / Low Voltage Directive 2014/35/UE
