The INP201 is a field mounted transmitter-indicator powered by the 4-20mA current loop. It includes in a single case (IP65) (explosion-proof ATEX approved) a loop powered programmable converter and a configurable indicator.

DESCRIPTION

Transmitter :

The INP201 can be equipped with any types of analog or digital " Head mounting" transmitters .

Enabling the material integration of all trademarks.

Display :

- powered by the 4...20mA current loop (mounted in series with the transmitter),
 - LCD liquid crystal display (4 digits, 10000 points) 10mm height, extended temperature
 - Configurable display range by push button (do not carry out this operation on site if the device is used in hazardous area)
- The device must not be opened powered on in hazardous area.

Feature:

- Cast aluminium head + epoxy painting (operating temperature -40°C....+80°C) .
- Multiple possibilities of mounting : on wall, on pipe (specify diameter), on temperature sensor.
- Explosion-proof approval coating according to EN50018, certificate (ATEX 6097X/01).
- CE 0081 II2G EExdIICT6 approval.
- IP65 protection rating

Operational safety data:

- SIL 2 : $\lambda f = 457$ fit , SFF = 95.4 % , DC = 91.8 %
type B components, HFT = 0

Synoptic:

Version and order code :

INP201 : - cast aluminium head, IP67, epoxy coating

option **/H :** HART communication
 /ADF : Explosion-proof protection
 /i : 316 Stainless Steel head (IP68)
 /SIL2: SIL2 version according to IEC 61508
 (all options are cumulative)
